

Hi folks,

Today, the barley search was conducted in the land of Israel, and barley WAS found in abundance throughout the search sites, so clearly we are in the right season for Passover. The new moon crescent is expected to be seen in Israel tomorrow night, and if it is seen, that will make tomorrow night and the following Sabbath the new moon day, AND the NEW YEAR will begin...!!!!

We will be having our Passover meal here on the night of April 10th, and will be celebrating the Feast of Unleavened Bread for seven days as commanded in scripture.... I may webcast the service.

take care,

Todd
