

Hi everyone...

The new moon crescent for the 12th biblical month has been seen tonight in the land of Israel. The crescent was also seen here from our location in Richmond VA. As you know, we DO NOT make the observations from this location, but rely upon non-biased observers in the physical land of Israel. This is a necessary requirement as we live on a round earth, and must have a common reference point, which is clearly Israel and Jerusalem.

The next observable crescent will kick off the biblical NEW YEAR, if the barley in Israel is found to be in the proper stage of growth (Abib). If the barley is not developed enough, there will be an extra month inserted into the calendar to assure proper alignment of the seasons. If the barley IS in the proper state of growth, that will mean that the Passover will be here very soon...!!! As you may already know and understand, True Bread absolutely REJECTS the pagan, man-made calendar of Hillel II and its "postponements", which actually MOVE the Holy Days around for the sake of convenience for the extremely strict and intolerant orthodox Jewish leaders. Shall we allow non-believers in our Savior to determine when we should celebrate the MOST IMPORTANT and MEANINGFUL Holy Day of the year, just for their "convenience"..??? Hardly. This year, the Passover will potentially be on the night of April 10 2009, pending the barely search.

If you wish to be notified of the new observed crescent directly, you may want to use the following link to sign up for the Karaite Newsletter. As previously stated, we DO NOT follow the doctrine of the Karaites at True Bread. However, we DO take advantage of their sincere efforts of making these vital observations for those wishing to use the crescent as their basis for a calendar. Here is the link:
